
(a) sums of $a_{G_{d,e}}(N)$ over the moduli, $N = 3000002$
$A/N = \sum|a_{d,e}|/N$
$Q/N = (\sum a_{d,e}^2)^{1/2}/N$
$|S_1|/N = |\sum a_{d,e}|/N$
$|S_\mu|/N = |\sum \mu(de)a_{d,e}|/N$
sum = N
$\theta = 1/2$
sum / N
θ $(de \le N^\theta)$
(b) normalised partial sums; band $|\cdot| \le 1.5$
$\sum_{de \le M} \mu(de)\, a_{d,e}\,/\,Q(M)$
$\sum_{de \le M} a_{d,e}\,/\,Q(M)$
partial sum / Q(M)
M
